Verify this document at rotorlab.app/verify: enter the code above, then give the page this file (or its SHA-256). The page names the issuing organization and shows the SHA-256 of every file issued under the code, so a copy edited in any way no longer matches. The digest covers the records this document was rendered from and everything printed on it. This is a tamper-evidence check, not a digital signature, and carries no legal signature status.
